PH800DBR
800nm Series

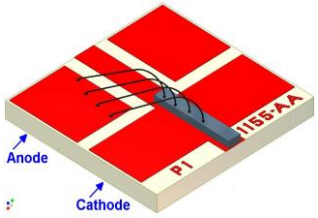
High-Power Single-Frequency Laser Diode

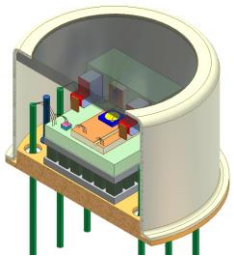
Technology

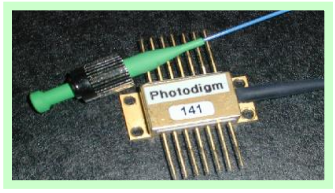
- DBR Single-Frequency Laser Chip
- InGaAs QW Active Layer
- Epi designed for high reliability

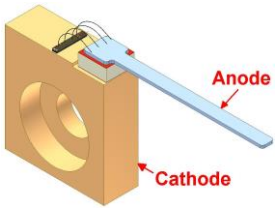
Features

- Available in several package styles
- Pulsed operation for spectral stability at short pulse lengths
- High power for CW applications
- High Slope Efficiency









Description

The PH800DBR Series of high-power edge-emitting lasers are based on Photodigm's advanced single-frequency laser technology. It provides a diffraction limited, single lateral and longitudinal mode beam. Facets are passivated for high-power reliability. Devices used in atomic spectroscopy based applications.

Handling Precautions

These devices are sensitive to ESD. When handling the module, grounded work area and wrist strap must be used. Always store in an antistatic container with all leads shorted together.

How To Order

Part number example: PH800DBR080CM. Assign optical power from those shown below. Use a three-digit format for all power entries. Call factory for special performance selection and certification to certain atomic absorption lines.
