\* = see chapter 'licensing' for license details and conditions.

**Replacement discount:**

BioControl offers a replacement discount when a VaDia (#71001) is returned to BioControl for repair outside the warranty conditions.

This replacement discount is based on the age of the VaDia (production date) as follows:

VaDia #71001 age (production date)	<1	1-2	2-3	3-4	>4	Years
List price discount when buying new #71001	40	30	20	10	0	%

The replacement discount is offered when the VaDia is returned following BioControl's Return Of Goods procedures (ROG-form).

**PC and OS requirements**

VaDia Suite is designed for PC's with Microsoft Windows Operating System.

Minimum OS: Windows 7 with .NET Framework 4.5 (also works with Windows 8 and 10)

Minimum RAM: 4GByte

**Licensing:**

The PC-program 'VaDia Suite' is divided in modules. At present the modules 'Milking Time Testing', 'Pulsator Testing' and 'Falloff Testing', 'Advanced Module' and 'Tablet Module' are available. After you have installed VaDia Suite, you can request a test license to try the complete VaDia Suite with all modules activated for a 14 days evaluation period.

VaDia Suite is copy-protected by a software key. This software key is a unique combination of license ID and password that can be purchased from BioControl. The purchase of a software key is equivalent to one user license for one user.

VaDia Suite will work when it is not connected to the internet, but the PC must be connected to the internet to activate the user license. VaDia Suite will stop working on the PC if the user license is not activated within the evaluation period after the test license has expired.

Included in the VaDia Suite user license is the right to automatic updates for a period of 12 months after activation. Updating warrants that VaDia Suite is always according to the latest modifications, improvements, insights and features. Automatic updating is done with 'VaDiaSuiteUpdater', a program that is part of VaDia Suite. When starting VaDia Suite, the VaDiaSuiteUpdater automatically makes contact with the BioControl server and looks for VaDia Suite updates. If available it will ask the user if the updates should be installed.

Extension for another 12 months automatic updating can be purchased from BioControl for EUR 50 at the end of the automatic updating period. Declining this extension implies that VaDia Suite will not be updated after this period. We recommend automatic updating so that you will always have the latest insights and features available and your system will continue to work, e.g. in case of Operating System increments.

Additional license activation:

A VaDia Suite licensee is entitled to additional activation under the following conditions:

- The same user wants to use VaDia Suite on maximum one additional PC (e.g. a desktop PC for in the office and a notebook PC for en-route).

Requests can be sent to [support@biocontrol.pl](mailto:support@biocontrol.pl) (note the PL-extension!), the email should include the license number, user name (as entered in the activation) and reason for the additional activation.

BioControl reserves the right to refuse additional activation requests in case of serious concerns regarding illegal copying.

Terms and conditions:

By installing and running the VaDia Suite software the user accepts 'BioControl General Conditions of Sale and Delivery' that is listed on the BioControl website.

## VaDia Order Form

### Customer information

Company name	
Contact person last name	
Contact person first name	
Mr./Mrs./ Ms.	
Email	
Telephone	
Fax	
VAT Nr. (EU only)	
Purchase Order Nr.	
Order date	

### Invoice address

Address (street, nr.)	
Postcode, City	
Country	
Email (if different)	

### Shipment address (if different)

Address (street, nr.)	
Postcode, City	
Country	
Email (if different)	

The above company/person hereby orders

Article Nr.	Article description	Quantity (pcs.)	Price (EUR)
<b>Sum order lines</b>
