

EXOSOME ISOLATION SOLUTIONS

- **Exosome isolation from a wide range of biofluids.**
 - Plasma, Serum, Cell Culture, urine, saliva, breast milk, LCR...
- **Very Clean & better exosomes preparations. Reduces carry-over of albumins and immunoglobulins compared to other isolation methods.**
- **Obtain intact exosomes suitable for a great variety of protein-sensitive applications and downstream uses.**
- **Increase biomarker sensitivity detection.**
- **Fast**
- **Cost-effective**
 - Save up to 40% with every reaction compared to other competitors solutions.
